

Integrating FCCLA National Programs in Your Curriculum

Submitted by Allison Kreifels, State Adviser, Nebraska

As teachers are sometimes overwhelmed with the depth and breadth of knowledge that they are expected to teach, you may wonder how in the world you can integrate an FCCLA program into your curriculum. Here are some tips to help you get started:

Have a Game Plan

- Look at your curriculum at the beginning of the year and plot what state and national programs you could implement.
- Don't be afraid to give up a favorite to try something new.
- Talk to your officer team as you plan your Program of Work and see what those students can come up with in advance.

Leave Freedom of Choice with the Students

- Let them choose specific units or specific subject areas within each project to give them more "artistic freedom" for their final outcome.
- Example: If students want to open their first bank accounts, a "Banking Basics" unit will interest them more than a "Making Money" unit in the Financial Fitness project.
- Vary the projects for individual and group work.

Make Your Team Work

- In the end, it is still their project!
- Show them the application for recognition and use that as part of, or even all, of your grading method.
- Evaluate students based on their in-class work and their completed national program. STAR Events also have their own scoring rubrics that could be used.

On the next few pages you can find a variety of project ideas that can be easily implemented into your curriculum. These projects are a great way to introduce students to FCCLA and the many programs and opportunities it offers. Please remember that this is not a conclusive list. Your list is as long as your students' creativity!
