

# Teach and Train

## FCCLA STAR Events Information

(Students Taking Action with Recognition)

**Teach and Train**, an individual event, recognizes participants who demonstrate their ability to explore and experience the career of teaching or training. Participants must prepare a portfolio of the teaching/training career, prepare and execute a complete lesson/workshop plan and an oral presentation. Senior and occupational participants will also complete a shadowing experience of a “best practices” educator. *Event is offered to members in the following categories: Junior (through grade 9), Senior (grades 10-12), Occupational (grades 10-12), Postsecondary*

### Project Connections

#### Top 5 Skills Students Report Learning Through Participation

Leadership	Self-Confidence

### Examples of Teach and Train Projects:

*"My project focuses on a career in Elementary Education. In this project, I explore the degrees and skills needed to become an elementary teacher in Kentucky. I then took multiple steps to evaluate myself as a possible future educator. Overall, I discovered that a career in Elementary Education is perfect for me and because of this project I feel more secure in my career choice." Kentucky FCCLA Member*

*"I researched, shadowed, and interviewed to explore if this career might be an area of interest as a future career for me. I spent time researching, finding activities, and making a lesson plan about the Rock cycle, which was the topic my teacher gave me aligned to the Minnesota academic standards. I went to the 6th grade science class and presented my lesson. Lastly I reviewed the assessments I gave the students to determine changes to make if I would teach it again." Minnesota FCCLA Member*

*"With this project I have learned to establish a lesson plan that goes along with what the students were doing prior to the lesson I taught. I have learned skills in classroom management and time management. I have also learned that there are many "hidden" obstacles that teachers go through each day. The lesson plan that I created was over Parallel and Perpendicular lines for a High School 9th Grade Honors Algebra class. Students were provided guided notes that were completed as a class, and they were given practice as a class with whiteboards. Once that was complete students were given a worksheet with 5 problems over the guided notes and examples as a summative form of student evaluation." Ohio FCCLA Member*

*"I presented two different lessons to two different age groups because I wanted to see what it would be like to teach each of these groups. I found that planning lessons and presenting in front of multiple students is not an easy task, regardless of the age group. This project was helpful in determining many things about my future career, such as what will be required of me, and how I will benefit from being a teacher." Oklahoma FCCLA Member*

*"For my project, I looked into what it would take to become a Family and Consumer Sciences teacher. I was able to shadow FACS teachers at the local middle school and then I created a lesson plan and was able to teach a 7th grade FACS class." Utah FCCLA Member*

### Teach and Train By the Numbers: 2016-2017

**Participants Nationwide:** 318  
**Categories:** Senior, Occupational, Postsecondary  
**Type of Event:** Career Focused  
**Nationwide Impact:** 48,854 people

95% of Teach and Train participants indicated this event is extremely or very useful to their future.  
82% of Teach and Train participants indicated they would pursue higher education related to the career chosen in their project.
